North of the Ordinary – Norway: the preferred country for clinical trials

Pioneering precision medicine and next generation clinical trials in a public healthcare system

Come meet a united coalition from Norway's healthcare system and healthcare industry to discuss Norway's ambitious strategic plan to further strengthen Norway as a country of excellence in the field of clinical trials.

Place: Venue nearby the ESMO conference (TBD)

Time: **13 September 2024** (Depending on venue we will start the reception at 17:30 or 18:30.
Once confirmed we will send an update)

The Norwegian Ministry of health has launched an ambitious strategic plan to strengthen Norway as a country of excellence for clinical trials. In collaboration with the industry, NorTrials as a national entry point for global companies wishing to conduct clinical trials in Norway, is established.

Norway offers:

- Access to excellent clinical trial units and internationally renowned clinicians and researchers
- One of the broadest collection of health registries in the world
- Established connection between health data and biobanks
- A single entry point to access all the country's clinical trials resources
- National infrastructure for precision diagnostics and advanced molecular diagnostics implemented as part of the public health care services
- On-going public-private collaboration for development of the health care services
- A well-structured specialist care system and a population with a high willingness to partake in clinical trials

Representatives from NorTrials, the healthcare industry, key-opinion leaders from the clinical side and Innovation Norway will meet and discuss how choosing Norway as a preferred clinical trials hosting country will strengthen the pipeline execution and strategic clinical trial development.

Please join and listen to our experts presenting the clinical trials strategy of the future.
